COMMUNICATION

MS Amendment
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

Applicants' representative, Thomas C. Chan, conducted a telephonic interview with Examiner A. Pierre-Louis on June 13, 2007. The time and consideration of the Examiner is greatly appreciated.

The substance of the interviews is hereby made of record as directed by MPEP § 713.04. No exhibits were shown nor any demonstrations presented. No agreement is reached. Claims 1, 12, and 23 were discussed in light of the Tcherniaev and Zhou references cited in the final Office Action. Applicants explained the response to final Office Action filed on January 16, 2007. Specifically, Applicants explained the differences between the pending claims and the Tcherniaev

pa-1177143

1

and Zhou references in terms of how dynamic information are communicated between the driver leaf circuit(s) and the receiver leaf circuit(s). In the case of the pending claims, a dynamic data structure called the port connectivity interface is used to accomplish this task. While in the Tcherniaev or the Zhou reference, alone or in combination, no dynamic data structure is created for this purpose. The communication of dynamic information is accomplished by traversing the multiple levels of the hierarchical data structure, which lowers the performance of the transient simulation.

In the event the U.S. Patent and Trademark Office determines that an extension and/or other relief is required, applicant petitions for any required relief including extensions of time and authorizes the Commissioner to charge the cost of such petitions and/or other fees due in connection with the filing of this document to Deposit Account No. 03-1952 referencing docket no. 188122001900. However, the Commissioner is not authorized to charge the cost of the issue fee to the Deposit Account.

Dated: July 20, 2007

Respectfully submitted

By 

Thomas C. Chan
